08/14/2009-On site inspection

IV. Description of Findings and Conclusions

The licensee has a bedroom which measures 498 square feet. This provides the 65 square feet of usable floor space per bed as required by R 400.1432(2). The rule also allows for a maximum of four beds in a multi-occupancy bedroom.

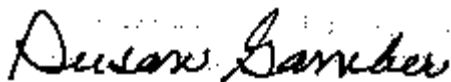

The resident bedroom is on the lower level of this split level home. Residents will share a living room which provides 193 square feet of living space. This meets the requirement of 35 square feet of living space per occupant in R 400.1427(1).

The lower level contains a half bathroom. Two full bathrooms are on the upper level which residents will have access to. This meets the requirement of R 400.1430(3) which requires a minimum of 1 toilet, 1 lavatory, and 1 bathing facility for each 8 occupants of the home.

While a number of members of Mrs. Arnold's family reside in this home they do not exceed the occupant limits imposed by R 400.1406(2).

V. Recommendation

I recommend increasing the licensed capacity to four and adding developmental disability to the specialized program type.
