The home has one and a half bathrooms on the main floor. Each bedroom has a closet. The facility has adequate storage areas. There is an attached garage which may be used for additional storage areas. There is a driveway with adequate parking for staff and visitors.

The furnace and hot water heater are located in the basement. Floor separation is achieved by a 1¾ inch solid core door equipped with an automatic self-closing device and positive latching hardware. The laundry facilities are located in the basement. The facility is equipped with interconnected, hardwire smoke detection system, with battery back-up, which was installed by a licensed electrician and is fully operational. Compliance with Rule 400.14410, bedroom furnishings, was demonstrated at the time of the final inspection. The bedrooms were adequately furnished, clean, and met all applicable rules relating to environmental and fire safety requirements.

The home has two separate and independent means of egress to the outside. The means of egress were measured at the time of the initial inspection and exceed the 30 inch minimum width requirement of the rule. The required exit doors are equipped with positive latching non-locking against egress hardware. All the bedroom and bathroom doors have conforming hardware and proper door width.
