## **II. Purpose of Addendum**

Increase in capacity.

## **III. Methodology**

On June 26, 2012, the licensee submitted a request for modification for an increase in capacity from 5 to 6 residents. An onsite inspection was completed on July 2, 2012 to inspect the additional bedroom that was added to the facility. The licensee added a small wing to the house where an additional resident bedroom would be located. This would change the capacity from 5 to 6.

The additional bedroom was measured and met the criteria for a resident bedroom.

| Bedroom #  | Room Dimensions | Total Square Footage | Total Resident Beds |
|------------|-----------------|----------------------|---------------------|
| Bedroom #4 | 11' 7 x 9'11    | 115                  | 1                   |

The licensee installed an approved smoke alarm system in the new resident bedroom area. The living and dining space also accommodate the addition of a 6<sup>th</sup> resident.

The licensee provided documentation of a new floor plan and an approved building permit from the local township authority.

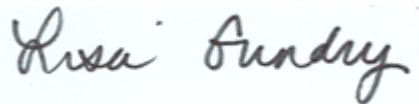

## **IV. Description of Findings and Conclusions**

The home was originally licensed for 5 residents at the time of the original licensure on April 21, 2011. At the licensee's request, the home was inspected on July 2, 2012 to include an additional bedroom to be used for a resident. The bedroom was approved for use as a resident bedroom.

The home is currently equipped to be suitable for 6 residents.

## V. Recommendation

I recommend that the capacity increase from 5 to 6 residents.
