II. Purpose of Addendum

Modification of the license to admit residents who require regular use of a wheelchair.

III. Methodology

01/30/14 Contact-Document received

Modification request for wheelchair accessibility

03/20/14 Inspection completed On-site

Both wheelchair ramps measured 2 inches short in run.

04/28/14 Inspection completed On-site

One of the ramps did not have handrails on one of the open sides.

05/19/14 Inspection completed On-site.

Both ramps approved.

IV. Description of Findings and Conclusions

On 05/19/14, I measured the wheelchair ramps at both of the approved means of egress at the two front doors of the facility. The wheelchair ramp located at the primary means of egress measured two feet in rise and twenty-seven feet of run. The ramp located at the secondary means of egress measured one foot two inches in rise and seventeen and a half feet in run. Both ramps terminate on solid concrete. Consequently, the wheelchair ramps meet the rule requirement for R 400.509.

V. Recommendation

I recommend the terms of the license be modified to allow admission of residents who require regular use of a wheelchair.
