II. Purpose of Addendum

The licensees remodeled the home, adding a large bedroom on the main floor of the residence which is intended for resident use. This remodeling reduced the common area for residents on the main level. In addition, the family has moved to the downstairs, where the lower level has been fully finished and remodeled. The lower level has a bedroom, large living area, full bathroom, and kitchen for family use.

III. Methodology

On November 30, 2015 an onsite inspection was conducted. The additional bedroom on the main level of the home measures 14'4" X 19'9", which exceeds the minimum required for two residents. The room is appropriately constructed and fully furnished, in compliance with R 400.1431, R 400.1432, and R 400.1433. There is a full bathroom on the main level for resident use.

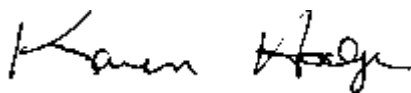

The common area of the home was reduced by the construction of the bedroom. The main living area measures 13'2" X 17'5" + 9' X 7'6" = 297SF which meets the requirement for living space. The lower level of the home is fully finished and was not measured since it is for family use, but it exceeds the common area of the main level.

IV. Description of Findings and Conclusions

Living and bedroom space meet the space, structure and furnishing requirements to accommodate 2 additional residents.

V. Recommendation

I recommend an increase in capacity from 4 to 6 residents.
