II. Purpose of Addendum

To add wheelchair accessible to the license.

III. Methodology

07/07/16-Contact-Document Received
Modification Request

07/12/16-Onsite Inspection

IV. Description of Findings and Conclusions

I conducted an onsite inspection at the home on 07/12/16 after receiving a request to modify the license to add wheelchair accessibility. The primary means of egress (front door) does not require a wheelchair ramp as it is level with the ground. The secondary means of egress (back door) was modified to include a wedge/ramp that terminates on concrete. A concrete pathway leading to a 12ftx12ft concrete slab was constructed in order to evacuate the residents a safe distance from the home. The modification meets the intent of the rule, and is approved.

V. Recommendation

I recommend the license be modified to add wheelchair accessible.
