III. DESCRIPTION OF FINDINGS & CONCLUSIONS

A. Physical Description of Facility

The Mapleview Adult Foster Care home is a two story family home to Joanna and Brian Gonyer and their daughter. The home is located in the quiet rural countryside near Fife Lake Michigan. One resident bedroom, the kitchen, dining room, two large living rooms, a bedroom for a family member and two bathrooms comprise the first floor of the home. The second floor has four bedrooms used by household members. The home is not equipped to accommodate those who regularly require the use of a wheelchair.

The furnace and hot water heater are located in the basement with a 1-3/4 inch solid core door equipped with an automatic self-closing device and positive latching hardware. The facility is equipped with an interconnected, hardwire smoke detection system, with battery back-up, which was installed by a licensed electrician and is fully operational. Detection heads have been installed near sleeping areas, in the living room, in the basement near the furnace. Fire extinguishers are installed on each floor of the home.

The facility has private water and septic system. An environmental health inspection was conducted on December 13, 2016. The Sanitarian determined the facility to be in substantial compliance with applicable rules.

Resident bedrooms were measured during the on-site inspection and have the following dimensions:

Bedroom #	Room Dimensions	Total Square Footage	Total Resident Beds
1	10'X9'4"	83	1

The living, dining, and sitting room areas measure a total of 412 square feet of living space. This exceeds the minimum of 35 square feet per occupant requirement.
