II. Purpose of Addendum

To increase resident capacity from 5 to 6.

III. Methodology

On 08/28/2018, I received a call from Amber Bunce, Administrator, informing me that the house was remodeled to increase capacity (a new bedroom was added). I informed her that I would need to come out and measure the bedroom and living space and we arranged for me to do so on 08/30/2018.

On 08/28/2018, I made an onsite inspection and measured the new bedrooms and living space.

IV. Description of Findings and Conclusions

The remodeling involved converting one bedroom to more living space and adding two new bedrooms and a half bath. The furnace/water heater/laundry room was also redone and there is a smoke detector in that room along with a fire safety door.

The modifications of the home allow for an increase of capacity from 5 to 6 residents, based on the following new measurements:

Bedroom #	Room Dimensions	Total Square Footage	Total Resident Beds
1			1
2			2
3 (New room)			2
4 (New room)			1

Total capacity: 6

The living space increased by 150 square feet for a total of 385 square feet of living space, which exceeds the minimum requirement.

V. Recommendation

I recommend an increase in resident capacity from 5 to 6.
