II. Purpose of Addendum

A request was received for a change in the use of space within the facility as well as add wheelchair accessibility to the license.

III. Methodology

01/19/2019- Request received from licensee designee June Mogg to modify license.

05/15/2020- Diane Stier left notes communicating this request had not been completed but was approved per her review of the file and documents received.

06/03/2020- Due to COVID-19 restrictions no on-site was completed but measurements were obtained and approved.

IV. Description of Findings and Conclusions

Part of the family room area was converted into a resident bedroom measuring 13'6" by 13'6". The family room area measured 13'6" by 12'6" after the conversion was completed. This new resident room is large enough for one or two residents and the remainder of the family room and living room space is large enough for six residents.

There were two wheelchair accessible ramps added to the facility as well. The first ramp is located off the porch connected to the kitchen and the second is connected to the entry way near the living room. Both exit onto a firm surface and allow for easy access away from the facility in the event of an emergency.

Ms. Mogg also submitted an updated floor plan to reflect the changes and new points of exit in the event of an emergency.

V. Recommendation

Based on the above information, I recommend the change in the use of space and the additional of wheelchair accessibility to the license.
