III. DESCRIPTION OF FINDINGS & CONCLUSIONS

A. Physical Description of Facility

ResCare Premier Neff Rd is a one-story facility with an attached two car garage. The exterior of the home is comprised of brick and vinyl siding. The home consists of a front sitting room, living room, dining room, kitchen, four resident bedrooms, two full bathrooms, laundry room, and office located on the main floor. The facility is wheelchair accessible. The facility is owned by Creative Developments Inc., and permission was granted for inspection of the home.

The furnace and hot water heater are located on the first floor of the home with a 1-3/4-inch solid core door equipped with an automatic self-closing device and positive latching

hardware. A furnace inspection and approval were completed on January 10, 2023. The laundry room is located on the main floor of the home. The facility is equipped with a smoke detection system and sprinkler system. The smoke detectors are all hard-wired into the home's electrical system with battery back-up and are in all sleeping and living areas. The facility has public water and sewer system.

There are four resident bedrooms located on the main floor of the home. Resident bedrooms were measured during the on-site inspection and have the following dimensions:

| Bedroom # | Room Dimensions | Total Square Footage | Total Resident Beds |
|-----------|-----------------|----------------------|---------------------|
| Bedroom 1 | 15'2" x 11'1" | 210 sq. ft. | 2 |
| Bedroom 2 | 15'4" x 11' | 211 sq. ft. | 1 |
| Bedroom 3 | 15'4" x 11'2" | 213 sq. ft. | 1 |
| Bedroom 4 | 15'2" x 10'8" | 162 sq. ft. | 2 |

The front sitting room, living room, and dining room areas measure a total of 453 square feet of living space. This exceeds the minimum of 35 square feet per resident requirement.

Compliance with Rule 400.14410, bedroom furnishings, was demonstrated at the time of the final inspection. The bedrooms were clean, neat, and met all applicable rules relating to environmental and fire safety requirements.

The home has four (4) separate and independent means of egress to the outside. The means of egress were measured at the time of the initial inspection and exceed the 30 inch minimum width requirement of the rule. The required exit doors are equipped with positive latching non-locking against egress hardware. All the bedroom and bathroom doors have conforming hardware and proper door width.

The home has fire extinguishers, which meets the requirements of R 400.14506. The bedrooms have the proper means of egress as required by R 400.14508. The interior of the home is of standard lathe and plaster finish or equivalent in all occupied areas. The home meets the environmental and interior finish requirements of rules R 400.14502, R 400.14503, and R 400.14504.

Based on the above information, it is concluded that this facility can accommodate **six (6)** residents. It is the licensee's responsibility not to exceed the facility's licensed capacity.

B. Program Description
