III. DESCRIPTION OF FINDINGS & CONCLUSIONS

A. Physical Description of Facility

Schiavone AFC IV is a two-story facility with a detached two car garage and basement. The exterior of the home is comprised of vinyl siding. The home consists of a living room, dining room, kitchen, five resident bedrooms, two full bathrooms, office, and laundry area located on the main floor. There is a full bathroom on each floor of the home. The facility is wheelchair accessible. The facility is owned by Licensee Designee, Judith Schiavone.

The boiler and hot water heater are in the basement of the home with at least 1-3/4-inch solid core door to create floor separation. A boiler inspection and approval were completed on November 6, 2024. The laundry room is located on the main floor of the home. The facility is equipped with a smoke detection system. The smoke detectors are all hard-wired into the home's electrical system with battery back-up and are in all sleeping and living areas. The facility has city water and sewer services.

There are six resident bedrooms. There are 4 resident bedrooms located upstairs and 1 located on the main floor of the home. Resident bedrooms were measured during the on-site inspection and have the following dimensions:

Bedroom #	Room Dimensions	Total Square Footage	Total Resident Beds
Bedroom 1 on 1 st floor	12' x 12'	144	1
Bedroom 2 SW 2 nd floor	12' x 12'	144	1
Bedroom 3 NW 2 nd floor	16'6" x 12'	198	2
Bedroom 4 NE 2 nd floor	11' x 14'	154	1
Bedroom 5 SE 2 nd floor	14' x 10'6"	147	1

The living room and dining room areas measure a total of 393 square feet of living space. This exceeds the minimum of 35 square feet per resident requirement.

Compliance with Rule 400.14410, bedroom furnishings, was demonstrated at the time of the final inspection. The bedrooms were clean, neat, and met all applicable rules relating to environmental and fire safety requirements.

The home has two (2) separate and independent means of egress to the outside. The means of egress were measured at the time of the initial inspection and exceed the 30 inch minimum width requirement of the rule. The required exit doors are equipped with positive latching non-locking against egress hardware. There are two ramps at the home for wheelchair use. All the bedroom and bathroom doors have conforming hardware and proper door width.

The home has fire extinguishers, which meets the requirements of R 400.14506. The bedrooms have the proper means of egress as required by R 400.14508. The interior of the home is of standard lathe and plaster finish or equivalent in all occupied areas. The home meets the environmental and interior finish requirements of rules R 400.14502, R 400.14503, and R 400.14504.

Based on the above information, it is concluded that this facility can accommodate **six (6)** residents. It is the licensee's responsibility not to exceed the facility's licensed capacity.

B. Program Description
