II. Purpose of Addendum

Licensees, Heaven Amandou and Malik Amandou, requested a change of the use of space in the home.

II. Methodology

On 8/18/25, Ms. Amandou and Mr. Amandou requested to change the use of space in the home allowing residents to occupy the main level and changing their living area to the basement which was previously licensed for resident use. On 8/26/25, I completed an onsite inspection at the home.

III. Description of Findings and Conclusions

On 8/26/25, the main level of the home was found to include the kitchen, a dining and living room, one staff office, one shared, full, resident bathroom, one private resident bedroom, and one semi-private resident bedroom. Resident bedrooms on the main floor were measured during the on-site inspection and have the following dimensions:

Bedroom #	Room Dimensions	Total Square Footage	Total Resident Beds
1	10'2" x 14'9"	150	2
2	9' x 12'5"	112	1

The upstairs dining and living rooms measure a total of 244 square feet of living space. This exceeds the minimum of 35 square feet per occupant requirement. Based on the above information, it is concluded that this facility can continue to accommodate three residents.

IV. Recommendation

I recommend the change in the use of space be approved, the living area on the main floor be licensed for resident use, and the basement now be utilized as the licensee's living area.
