## II. Purpose of Addendum

Licensees, Heaven Amandou and Malik Amandou, requested a change of the use of space in the home to allow for an increase in capacity.

## III. Methodology

On 10/13/25, Ms. Amandou and Mr. Amandou requested that a room on the main floor that was not previously licensed for resident use, due to it being a staff office, be licensed as a private resident bedroom and that the capacity of the home be increased from 3 residents to 4 residents with the use of this space.

## IV. Description of Findings and Conclusions

On 10/14/25, the main level of the home was found to include the kitchen, a dining and living room, one communal, full bathroom, one private resident bedroom, one semi-private resident bedroom, and one staff office.

I measured the room licensed as the staff office. I found it to have the following dimensions which are sufficient for a private resident bedroom:

Bedroom #	Room Dimensions	Total Square Footage	Total Resident Beds
3	8'10 x 8'10	78	1

The upstairs dining and living rooms measure a total of 244 square feet of living space. This exceeds the minimum of 35 square feet per occupant requirement. Based on the above information, it is concluded that this facility can accommodate four residents.

## V. Recommendation

I recommend the room previously licensed as a staff office on the main level of the home be licensed as a private resident bedroom and the capacity of the home be increased from three residents to four residents.
