Dear Christopher Risner:

Attached is the Renewal Licensing Study Report for the facility referenced above. The violations cited in the report require the submission of a written corrective action plan. The corrective action plan is due 15 days from the date of this letter and must include the following:

- How compliance with each rule will be achieved.

### III. DESCRIPTION OF FINDINGS & CONCLUSIONS

This facility was found to be in non-compliance with the following rules:

**R 400.647                      Safety and maintenance of premises.**

**(15) Sidewalks, fire escape routes, and entrances must be kept reasonably free of hazards, such as ice, snow, and debris.**

- While the wheelchair ramp was observed to be free of snow, ice, and debris, there was snow observed at the end of the ramp, creating a barrier to moving a safe distance away from the building. The administrator corrected this issue on the same date as the inspection.

**R 400.721                      Interior finishes prohibited materials.**

**The following materials must not be used as an interior finish in a facility unless they are at least class C rated:  
(g) Other finish materials that contribute to the rapid spread of fire or give off dense smoke or toxic gases.**

- There was paneling observed (on one side) in the stairwell of the basement. The licensee will need to demonstrate that the interior finish is at least Class C rated or remove the paneling.

### IV. RECOMMENDATION

Contingent upon receipt of an acceptable corrective action plan, renewal of the license is recommended.
