RE: License #: AF800274033
Cozy Hill
09441 44th Street
Bloomingtondale, MI 49026

Dear Stephen Stassek and Minerva Stassek:

Attached is the Renewal Licensing Study Report for the facility referenced above. The violations cited in the report require the submission of a written corrective action plan. The corrective action plan is due 15 days from the date of this letter and must include the following:

- How compliance with each rule will be achieved.
- Who is directly responsible for implementing the corrective action for each violation.
- Specific dates for each violation as to when the correction will be completed or implemented.
- How continuing compliance will be maintained once compliance is achieved.
- The signature of the licensee or licensee designee or home for the aged authorized representative and a date.

Upon receipt of an acceptable corrective plan, a regular license will be issued. If you fail to submit an acceptable corrective action plan, disciplinary action will result.

Please contact me with any questions. In the event that I am not available and you need to speak to someone immediately, you may contact the local office at (517) 335-5985.

Sincerely,

A handwritten signature in blue ink that reads "KDuda".

- Incident report follow-up? Yes No If no, explain.
- Corrective action plan compliance verified? Yes CAP date/s and rule/s:
N/A
- Number of excluded employees followed-up? N/A
- Variances? Yes (please explain) No N/A

III. DESCRIPTION OF FINDINGS & CONCLUSIONS

This facility was found to be in non-compliance with the following rules:

R 400.645 Environmental health.

(3) A licensee shall provide hot and cold running water under pressure. A licensee shall maintain the hot water temperature for a resident's use at a range of 105 degrees Fahrenheit to 120 degrees Fahrenheit at the fixture.

The water temperature was measured to be 136 degrees Fahrenheit.

R 400.647 Safety and maintenance of premises.

(6) Plumbing fixtures and water and waste pipes must be properly installed and maintained in good working condition.

One bathroom did not have running water in the bathroom sink.

R 400.715 Facility environment; fire safety, adoption by reference.

(1) A facility that has a capacity of 4 to 6 residents shall be equipped with an interconnected multi-station smoke detection system that is powered by the facility's electrical service. When activated, the system must initiate an alarm that is audible in all areas of the facility. The smoke detection system must be installed on all levels, including basements, common activity areas, and outside each sleeping area, excluding crawl spaces and unfinished attics, to provide full coverage of the facility. The system must include a battery backup to ensure that the system is operable if there is an electrical power failure and accommodate the sensory impairments of residents living in the facility, if needed. A fire safety system must be installed in accordance with the manufacturer's instructions by a licensed electrical contractor and inspected annually. A record of the inspections must be maintained at the facility for 2 years.

The facility did not have a copy of the smoke detector inspection available for review.

IV. RECOMMENDATION

Contingent upon receipt of an acceptable corrective action plan, renewal of the license is recommended.
