RE: License #: AS820295005
Investigation #: 2026A0101043
Destined Place

Dear Mr. Anwunah:

Attached is the Special Investigation Report for the above-referenced facility. Due to the violations identified in the report, a written corrective action plan is required. The corrective action plan is due 15 days from the date of this letter and must include the following:

- How compliance with each rule will be achieved.
- Who is directly responsible for implementing the corrective action for each violation.
- Specific time frames for each violation as to when the correction will be completed or implemented.
- How continuing compliance will be maintained once compliance is achieved.
- The signature of the responsible party and a date.

If you desire technical assistance in addressing these issues, please feel free to contact me. In any event, the corrective action plan is due within 15 days. Failure to submit an acceptable corrective action plan will result in disciplinary action.

Please review the enclosed documentation for accuracy and contact me with any questions. In the event that I am not available and you need to speak to someone

immediately, please contact the local office at (313) 456-0380.

Sincerely,

Edith Richardson, Licensing Consultant

10/08/2026	Contact – Telephone call made Resident A's caseworker, Mr. Dempster
10/08/2026	Exit Conference with designated person Ms. Anwunah

ALLEGATION: In June of 2026, Resident A did not receive his medication as prescribed.

INVESTIGATION: According to the complainant, during Resident A's last hospitalization it was determined that Resident A's illness was because he did not receive his medication.

On 08/12/2026, I reviewed Resident A's resident record. I observed a hospital discharge summary that stated he was hospitalized on 06/04/2026, and 06/05/2026. The discharge summary gave a list of medications to be taken at home. Furthermore, the discharge summary stated take only the medications listed in the

hospital discharge summary, see below.

The discharge summary also instructed Resident A to see his primary care provider within two to five days. According to Resident A's health care appraisal on 06/09/2026, he saw his primary care physician, Dr. Everett Bryant MD. The health care appraisal also gave a list of Resident A's current medications, see below.

HOSPITAL DISCHARGE SUMMARY MEDICATION	DR. BRYANT'S LIST OF RESIDENT A'S CURRENT MEDICATIONS
Escitalopram 20 mg – 1 tab by mouth daily Metformin 850 mg – 1 tab by mouth every morning Benztropine 1mg – 1 tab by mouth daily Levetiracetam 500 mg – 1 tab by mouth two times daily Pantoprazole 40 mg – 40 mg by mouth daily Divalproex Sodium (Depakote 250 mg) – 1 tab by mouth each bedtime Divalproex Sodium 500 mg – 1 tab by mouth two times daily	Metformin 850 mg- 1 tab two time daily Lexapro (Escitalopram) 20 mg - one tab at 5:00 pm Keppra (Levetiracetam) 500 mg - 1 tab two times daily Depakote ER 500 mg - 1 tab two times daily Depakote ER 250 mg – 1 tab at bedtime Vitamin D3 50,000 units – 1 tab weekly Benztropine 1 mg – 1 tab daily

On 08/12/2026, I reviewed Resident A's medication logs for May 2026, June 2026, and July 2026. According to May 2026 and July 2026 medication logs, Resident A received his medications as prescribed. However, when I reviewed June 2026 medication logs, I found several discrepancies regarding Resident A's medications. Resident A's resident record contained five medication logs for June 2026.

Medication log one is a computer-generated log from Nine Mile RX that contained

the following information.

Vitamin D 50,00 take 1 capsule by mouth weekly on Friday	According to medication log one, Vitamin D was given to Resident A on 06/12/2026, 06/19/2026, and 06/26/2026. Medication log one also indicated that this medication was not given on 06/05/2026, because Resident A was hospitalized.
Ferosul 325mg take 1 tablet by mouth daily	According to medication log one, Ferosul was given to Resident A on 06/01/2026, 06/02/2026, and from 06/06/2026, through 06/30/2026. Medication log one also indicated that this medication was not given on 06/03/2026, through 06/05/2026, because Resident A was hospitalized.
Metformin 850 mg take 1 take by mouth twice daily	According to medication log one, Metformin was given to Resident A on 06/01/2026, 06/02/2026, and from 06/06/2026, through 06/17/2026. Medication log one also indicated this medication was not given on 06/03/2026, through 06/05/2026, because Resident A was hospitalized.
Melatonin 3mg take 1 tablet by mouth at bedtime	According to medication log one, Melatonin was given to Resident A on 06/01/2026, 06/02/2026, and from 06/06/2026 – 06/17/2026. Medication log one also indicated Melatonin was not given on 06/03/2026, through 06/05/2026, because Resident A was hospitalized.
Levetiracetam 500 mg take 1 tablet by mouth twice daily	According to medication log one, Levetiracetam was given 06/06/2026 – 06/17/2026. Medication log one also indicated this medication was not given on 06/03/2026, through 06/05/2026 because Resident A was hospitalized.

According to the hospital discharge summary, when Resident A returned home from the hospital on 06/06/2026, the licensee should have discontinued administering Vitamin D, Ferosul and Melatonin. According to medication log one, Resident A was given Vitamin D and Ferosul the entire month of June, excluding the days he was hospitalized. Medication log one also indicated that he was given Melatonin up until 06/18/2026, excluding the days he was hospitalized. According to Dr. Bryant's current list of Resident A's medications, it also did not indicate Resident A was supposed to be given Melatonin or Ferosul.

The hospital discharge summary stated Metformin 850mg was to be given, one tablet by mouth every morning. According to medication log one, Resident A was given one Metformin tablet 850mg twice daily.

Regarding Resident A's Levetiracetam medication, Pursuant to licensing rule 675 (4)(b)(v) medication logs must contain the "Initials of the individual who administered the medication at the time given." According to medication log one, on 06/01/2026, through 06/03/2026, Resident A did not receive his 8:00 a.m. dose of this medication and on 06/01/2026, and 06/02/2026, he did not receive his 8:00 p.m. dose of this medication. The boxes that staff are supposed to initial to indicate that this medication was given did not contain a staff's initials, instead of initials it had a line drawn threw those boxes and above the line the word "received" was written.

On 08/26/2026, I spoke with the designated person Ms. Anwunah regarding medication log one not containing the staff's initials for Resident A's Levetiracetam medication on 06/01/2026, 06/02/2026 and 06/03/2026. Ms. Anwunah stated that "medications are not always delivered on time." We discussed contacting the pharmacy prior to the medication getting low.

Medication log two is a computer-generated log from Genoa Healthcare which contained the following information:

Lexapro 20 mg take one tablet by mouth every day at noon Dsp as: escitalopram	According to medication log two Lexapro was given 06/06/2026, – 06/17/2026. Medication log two also indicated it was not given on 06/03/2026, through 06/05/2026, because he was hospitalized.
Depakote ER 500mg take one tablet by mouth twice daily Dsp as Divalproex ER 500mg	According to medication log two Depakote 500mg am dose was given from 06/01/2026 – 06/17/2026 and the pm dose was given 06/01/2026 – 06/16/2026. Medication log two also indicated Resident A was hospitalized from 06/03/2026 – 06/05/2026.
Depakote 250mg DR take one tablet at bedtime. Dsp as: Divalproex 250mg	According to medication log two Depakote 250mg was given 06/01/2026 – 06/16/2026. Medication log two also indicated it was not given on 06/03/2026, through 06/05/2026, because he was hospitalized.
Benztropine 1 mg take one tablet by mouth daily	According to medication log two Benztropine was given 06/01/2026, – 06/17/2026. Medication log two also indicated it was not given on 06/03/2026, through 06/05/2026, because he was hospitalized.
Haldol Decan 100mg/ml INJ: Inject 150MG intramuscularly every four weeks Dsp as: Haloper Dec	According to medication log two Haldol was given on 06/09/2026, by the RN
Glucophage 850mg take one tablet by mouth twice daily Dsp: Metformin	According to medication log two Glucophage was given 06/01/2026, – 06/10/2026. Medication log two also indicated it was not given on 06/03/2026, through 06/05/2026, because he was hospitalized.
Vitamin D3 50,000 units – 1 tab weekly	According to medication log two Vitamin D was not given

According to medication log two Resident A was given an additional 850 mg of Metformin twice daily from 06/01/2026, until 06/10/2026. Neither the hospital discharge summary nor Dr. Bryant prescribed that amount of Metformin to be administered.

According to Dr. Bryant's list of Resident A's current medications, his Lexapro/escitalopram medication was supposed to be given at 5:00 p.m., however according to medication log two it was given at 12:00 p.m.

According to medication log two, Resident A did not receive his Lexapro/escitalopram medication on 06/01/2026 through 06/03/2026. The boxes that staff are supposed to initial to indicate that this medication was given did not contain a staff's initials, instead of initials it had a line drawn threw those boxes and above the line the word "received" was written.

Medication log three is a computer-generated log from Nine Mile RX. This

medication log only had one medication listed, Divalproex Sodium DR 500 mg. All the other medications listed on this log were handwritten.

Divalproex Sodium DR 500mg take one table by mouth twice daily	According to medication log three this medication was given in the am from 06/18 2026 - 06/30/2026 and in the pm from 06/17/2026 – 06/30/2026.
Divalproex Sodium 250 mg take one tablet by mouth at bedtime	According to this medication log this medication was given from 06/18/2026 - 06/30/2026.
Benztropine 1mg take one tablet by mouth once daily	According to this medication log this medication was given from 06/18/2026 - 06/30/2026.
Escitalopram 20 mg take 1 tablet by mouth daily	According to this medication log this medication was given from 06/18/2026 - 06/30/2026.
Metformin 850 mg take one tablet by mouth once daily	According to this medication log this medication was given from 06/18/2026 - 06/30/2026.
Pantoprazole 40 mg take one tablet by mouth once daily	According to this medication log this medication was given from 06/18/2026 - 06/30/2026.

Medication log four is an AFC handwritten medication log.

Levetiracetam 500mg take one tablet by mouth twice	According to this medication log this medication was given in the am from 06/18/2026 -06/30/2026 and in the pm from 06/17/2026 – 06/30/2026.
Simethicone 125 mg take 1 tablet by four times daily as needed	According to this medication it was not given.

Medication log five is a computer-generated medication log from Nine Mile RX.

Pharmacist Choice Ultra T each use as directed three times daily	Used as directed from 06/01/2026 – 06/30/2026 twice daily.
Accu – Check Guide Test Stri each each use as directed three times daily	Used as directed from 06/01/2026 – 06/30/2026 twice daily.
Simple Diagnostic Lancin use as directed three times daily	Used as directed from 06/01/2026 – 06/30/2026 twice daily.
Pharmacist Choice Alcohol 70% each pads use as directed three times daily	Used as directed from 06/01/2026 – 06/30/2026 twice daily.
Gas relief Extra Strength 125mg take one tablet four times a day as needed	Not given
Loperamide Hydrochloride 1mg/75ml take 15ml every 4 – 6 hours as needed	Given one time on 06/01/2026.

According to Resident A's health care appraisal he has type two diabetes and medication log five indicated he received equipment to monitor his blood sugar for June 2026. However, according to the medication log his blood sugar testing was done twice daily instead of three times a day.

On 10/8/2026, I spoke with Ms. Anwunah. Ms. Anwunah was not aware that Resident A's blood sugar was being monitored. Ms. Anwunah did not have an explanation why Resident A's blood sugar was not monitored three times a day as directed.

On 10/08/2026, I conducted an exit conference with the licensee designee, Ms. Anwunah. Ms. Anwunah did not dispute or provide evidence to negate my findings. Ms. Anwunah gave several examples of how outside variables, the staff, multiple doctors and pharmacies can contribute to medication errors. Then we discussed the

advantages of having a medication coordinator position.

APPLICABLE RULE	
R 400.675	(1) Medication must be given, taken, or applied as prescribed, ordered, or directed by an appropriately licensed health care professional.
ANALYSIS:	Based on the preponderance of evidence, medications were not being given, taken, or applied as prescribed, ordered, or directed by an appropriately licensed health care professional. According to the hospital discharge summary, Resident A was hospitalized on 06/04/2026, and 06/05/2026. When Resident A was discharged from the hospital he was given a discharge summary. The discharge summary gave specific instructions to be followed when he returned home. The licensee did not follow the medication instructions in the discharge summary. The discharge instructions stated take only the medications listed in the discharge summary. However, the June 2026 medication logs showed that he was given other medications, and some medications were not given as prescribed. On 08/12/2026, I reviewed Resident A's resident record, it contained five medication logs for the month of June 2026. Three of the five medication logs contained several discrepancies regarding Resident A's medications.
CONCLUSION:	**VIOLATION ESTABLISHED**

IV. RECOMMENDATION

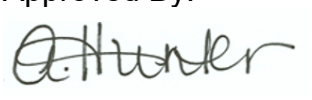

Contingent upon an acceptable corrective action plan, I recommend that the status of the license remains unchanged.
