## **II. Purpose of Addendum**

A request from the Licensee was made to modify the original license from a bed capacity of 4 to a bed capacity of 6.

## **III. Methodology**

Inspection of the home was completed on 12/06/2004. The garage had been converted into two new individual bedrooms along with a large living area. The new living room has a large picture window. An exit exist off the new area.

## **IV. Description of Findings and Conclusions**

The new construction consist of ¾” dry wall. The smoke detectors were properly mounted on the ceilings and were found in each bedroom and in the living area. The two new bedrooms are larger than the administrative rules require for an individual bedroom. Each bedroom was found to be over the 65 square feet. The bedrooms were furnished adequately related to the administrative rules. The Licensee also had adequate linens. The new living area along with the original areas is more than the required living space of 35 per square feet per resident, for the six residents. The dining space can accommodate all six residents. The licensee had posted the evacuation plan. The licensee provide a signed statement, dated November 17, 2004, from Awesome Electric, Ind., Robert L Beaudry, Sr. Master Electrician, #6207539, stating, “I have inspected the heater that was recently installed at 11705 Edgerton. The heater is properly grounded to a 220 volt receptacle with a 20 amp double pole breaker.”

## **V. Recommendation**

I recommend the request for modification of the terms of the license for an increase of the bed capacity from 4 to 6 be issued.
