II. Purpose of Addendum

Increase in license capacity

III. Methodology

10/06/2010: received request to increase capacity and documentation of interconnected smoke detection system.

IV. Description of Findings and Conclusions

This facility had previously been licensed with a capacity of four, as the bedroom has sufficient space for four residents. However, special certification rules require that facilities licensed for more than three have an interconnected smoke detection system, which this facility did not have. Consequently the capacity was reduced to three in June 2010. Mrs. Arnold has now provided documentation that an interconnected smoke detection system has been installed and requested that her capacity returns to four residents.

V. Recommendation

I recommend that the adult foster care family home license and special certification capacity be increased to four residents.
