II. Purpose of Addendum

To re-evaluate licensed capacity.

III. Methodology

Onsite inspection on 11/04/2010 to measure south bedroom.

IV. Description of Findings and Conclusions

On 10/02/2010 the licensee sent a written request to increase capacity to 6 residents. The south bedroom was not part of the OLSR and was not licensed for residents use.

The home was originally licensed for 3 residents with the following dimensions:

NW bedroom-112 sq ft (1 resident)

N bedroom-124 sq ft (1 resident)

NE bedroom-98 sq ft (1 resident)

On 08/12/2010 the licensee's request for a variance was approved to increase the resident capacity of the North bedroom from a 1 resident bed to a 2 bed occupancy room. This increased the total capacity to 4 residents.

During the onsite inspection on 11/04/2010 the south bedroom was inspected and had the following dimensions and capacity:

South bedroom $12.92 \times 10.5 = 135$ sq ft (2 residents)

Based on the bedroom dimensions and the licensee's request to increase capacity, I conclude that the home can accommodate 6 residents.

V. Recommendation

Recommend increasing capacity from 4 to 6 residents.
