III. DESCRIPTION OF FINDINGS & CONCLUSIONS

A. Physical Description of Facility

This home is a two story colonial home, located in a subdivision southeast of downtown Cheboygan. The main floor of the home consists of a living room, family room, dining, room, kitchen, half-bathroom and laundry room. The second floor consists of three resident bedrooms, a full bathroom and the applicant's bedroom and full bathroom.

The gas furnace and hot water heater are located in the basement with a 1-3/4 inch solid core door equipped with an automatic self-closing device and positive latching hardware located at the top of the stairs. Battery powered, single station smoke detectors have been installed near sleeping areas, in the living room and in the basement near the furnace.

The home utilizes a private water well and septic system. An environmental health inspection was conducted on 12/14/10. The Sanitarian determined the facility to be in substantial compliance with applicable rules.

Resident bedrooms were measured during the on-site inspection and have the following dimensions:

Bedroom #	Room Dimensions	Total Square Footage	Total Resident Beds
1	157" x 148" 14" x 96"	170	2
2	133" x 143"	132	2
3	177" x 137" 75" x 45"	192	2

The living, dining, and family room areas measure a total of 634 square feet of living space. This exceeds the minimum of 35 square feet per occupant requirement.

Based on the above information, it is concluded that this facility can accommodate six (6) residents. It is the licensee's responsibility not to exceed the facility's licensed capacity.

The applicant has indicated their intention to achieve and maintain compliance with reporting and investigation of each incident and accident involving a resident, employee, and/or visitor.
