II. Purpose of Addendum

The purpose of this addendum is to describe the increased licensed bed capacity that has resulted from completion of all phases of this facility's construction.

III. Methodology

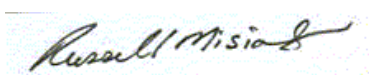

On 9/9/14, I inspected the facility and confirmed occupancy approval with Health Facilities Engineering Section for phase II of the construction permit. On 9/11/14, I confirmed full fire safety certification for phase II from the Bureau of Fire Services.

IV. Description of Findings and Conclusions

Phase II construction consists of the addition of two adjoining hallways that connect to the north part of the existing home for the aged building. Newly constructed Bungalow and Lake Cottage hallway neighborhoods each consist of six resident units. Bungalow and Lake Cottage resident room's replicate square footage and furnishings found within the existing Colonial, Victorian, and Brownstone hallway neighborhoods of the facility. Each Hallway is outfitted with its own day dining and gathering room and each connects to common hallway that leads to the larger main dining and gathering areas of the facility.

V. Recommendation

I recommend the facility licensed bed capacity be increased to 30.
