II. Purpose of Addendum

The purpose of this addendum is to correct licensed bed capacity and define resident day/ dining space of Appledorn ALC North.

III. Methodology

On 6/22/15, I received email correspondence from Ms. Garfield-Sharkey notifying me that the licensed bed capacity on the original licensing study for Appledorn ALC North was incorrect. On 6/22/2015, I reviewed the licensee's original home for the aged application within the facility licensing file. On 6/24/15 and 6/29/15, I received email correspondence containing the facility room sheets from Health Facilities Engineering Section Engineer Riyadh Almuktar and his licensed bed certification.

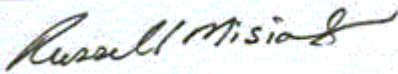

IV. Description of Findings and Conclusions

Review of the Facility licensing file reveals application from Licensee to operate an 88 bed facility.

Review of HFES documentation reveals Mr. Almuktar certified the facility's licensed bed capacity at 65. In addition, Mr. Almuktar certified resident day/dining space as 2195 square feet.
