II. Purpose of Addendum

To modify the home's program to include residents with mental illness and developmental disabilities in addition to the aged and those with physical handicaps.

III. Methodology

A revised program statement was provided and reviewed on 3/11/2016. An on-site inspection was conducted on 3/16/2016. On 01/04/2016, the home was granted temporary certification of specialized services to persons with a mental illness and/or a developmental disability.

IV. Description of Findings and Conclusions

The licensee has revised the home's program and admission statements to address the importance of the compatibility of residents in the home. A full assessment is conducted before placement, to assure a suitable fit. The home's revised program statement states the home's residents may have varying diagnoses, both physical and psychological. However, the home determines admission not based on any particular diagnosis, but rather through an assessment of the resident's needs and services offered, as well as their compatibility with other residents in the home. The home's admission statement indicates the home is unable to accept residents who are not compatible with other residents in the home, and due to the frail health of some of the home's residents, they are unable to accept individuals who demonstrate physical aggression.

Several residents in the home have dual diagnosis, receiving services from both Centracare and the community mental health agency Summit Pointe. Through interviews with several of the home's residents, as well as an observation of the home's environment, the home has demonstrated that they take the steps necessary to ensure the appropriate placement of residents in the home.

V. Recommendation

I recommend approval of the change to the home's terms to include residents who have mental illness or developmental disabilities in addition to those who are aged and physically handicapped.
