## III. DESCRIPTION OF FINDINGS & CONCLUSIONS

### **A. Physical Description of Facility**

The home is a ranch style construction located in the rural area of Lachine. There are four bedrooms, three resident bedrooms are located on the main floor of the home and one bedroom located in the walkout basement which will be used by the licensee. There are also two full bathrooms one located on the main floor and one in the basement. There is a spacious living room which opens into the dining room and kitchen area off the main entrance to the home. There is also an attached two-car garage and a bonus garage on the backside of the home near the walkout basement. The home is not wheelchair accessible.

The home has a natural gas forced air furnace and hot water heater. The furnace and hot water heater are located in the basement with a 1-3/4 inch solid core door equipped with an automatic self-closing device and positive latching hardware. The facility is equipped with battery powered, single station smoke detectors which have been installed near sleeping areas, in the living room and in the basement near the furnace. Fire extinguishers are installed on each floor of the home.

The facility has private water and septic system. An environmental health inspection was conducted on 8/28/2019. The Sanitarian determined the facility to be in substantial compliance with applicable rules.

Resident bedrooms were measured during the on-site inspection and have the following dimensions:

Bedroom #	Room Dimensions	Total Square Footage	Total Resident Beds
1	10.5'X13'	136	1
2	17'X11'	187	2
3	10.5'X11.5'	120	1

The living, dining, and sitting room areas measure a total of 384 square feet of living space. This exceeds the minimum of 35 square feet per occupant requirement.
