Program Type:	DEVELOPMENTALLY DISABLED

II. Purpose of Addendum

To modify the floor plan and original layout of the facility.

III. Methodology

I completed onsite inspections at the facility on 7/10/19 and 11/7/19. The licensee requested to have all private rooms at the facility. The garage was recently converted into 2 separate bedroom spaces. The home no longer has a garage. A second furnace was installed outside these rooms as the heating and cooling source. This furnace room has a fire door with automatic closure in the hinges, as well as, a permanent vent that leads directly to the outside. Both bedrooms shall be furnished in accordance to the Rules.

IV. Description of Findings and Conclusions

Bedroom #5 was measured with the following dimensions:

$$15.33 \times 9.75 = 149$$

Bedroom #6 was measured with the following dimensions:

$$9.5 \times 10.33 (98) + 5.25 \times 5.66 (30) = 128$$

Therefore, the 2 new bedrooms meet the requirements for single occupancy.

V. Recommendation

I recommend the Original Licensing Study report is modified to change the floor plan to include 2 additional bedrooms.
