II. Purpose of Addendum

The licensee designee submitted a modification request indicating a ramp had been built onto the facility making it wheelchair accessible.

III. Methodology

09/26/2021 – Contact – Document Received – Licensee designee, Karmen Ball, submitted modification request

10/11/2021 – Inspection completed on-site – Measured wheelchair ramp

IV. Description of Findings and Conclusions

The facility was originally licensed on 04/07/2010 but was not wheelchair accessible.

On 09/26/2021, the licensee designee submitted a modification request indicating a ramp and deck had been built onto the facility to make it wheelchair accessible.

On 10/11/2021, I conducted an announced on-site inspection of the ramp and deck. Though the facility has two means of egress out of the facility, these two exits are located within approximately 10 feet of one another on the same side of the facility (North side). To make the facility wheelchair accessible, the licensee built a deck off the North side of the facility, which connects both exits. Two steps were built off the deck allowing access to the driveway and a ramp was built off the East side of the deck. Due to the location of the facility’s only two means of egress and both means of egress accessing the facility’s ramp makes the one wheelchair ramp sufficient for the facility.

V. Recommendation

I approve the licensee designee’s request to change the terms of the facility by making it wheelchair accessible, effective 10/13/2021.
