RE: Application #: AH820405630  
Provision Living of Livonia  
33579 8 Mile Road  
Livonia, MI 48152

Dear Ms. Hescott:

Attached is the Original Licensing Study Report for the above referenced facility. The study has determined substantial compliance with applicable licensing statutes and administrative rules. Therefore, a temporary license with a maximum capacity of 58 is issued.

Please review the enclosed documentation for accuracy and contact me with any questions. In the event that I am not available, and you need to speak to someone immediately, please contact the local office at (517) 284-9730.

Sincerely,

A handwritten signature in black ink, appearing to read "Andrea Krausmann".

03/03/2022	Contact – Document received Confirmed status update with LARA corporation on-line filing system.

### **III. DESCRIPTION OF FINDINGS & CONCLUSIONS**

#### **A. Physical Description of Facility**

Provision Living of Livonia was built in 2022, a one-story I-2 construction residential facility located in northwestern Wayne County at 33579 Eight Mile Road in Livonia. The building is on the south side of Eight Mile Road, a five-lane road zoned 45 mph. It is located within a shopping center lot with commercial retail. The driveway and parking lot are in front of the building.

The home has 54 residential units with a total approved capacity of 58 resident beds. The facility’s main entrance leads into the assisted living area of the facility. This area is designed for residents that require assistance with activities of daily living. The assisted living area includes the lobby, administrative offices, conference room, the main kitchen, dining room, hair salon, library, staff break room, staff offices/desk areas, various activity spaces, and laundry service rooms. There are 40 residential units in this assisted living area with four units approved for double occupancy: Rooms 102, 103, 137, and 142.

Various unit configurations are available in this assisted living area including studios, one-bedroom units, and 2-bedroom units. Each assisted living unit has its own attached bathroom with shower and individualized heat/AC unit. Compact refrigerators are also available in assisted living units.

The facility’s memory care area is a designated hallway located along the southeast side of the building. There are 14 studio units in the memory care area, all approved for single occupancy. It is a secured unit designed for individuals who have been diagnosed with Alzheimer’s disease or a related condition. The memory care area can be entered via the assisted living area. For resident safety, main exit doors in the

memory care area are secured with delayed egress bars and numbered keypads that can be opened with staff assistance.

Each memory care unit has its own attached bathroom with shower and individualized heat/AC unit. Windows in the memory care unit rooms are equipped with stop devices so that they can only be opened a few inches for resident safety. The memory care unit has its own dining room, a meal service area including an induction-type stove top, a staff office/desk area, and activity space. Meals are prepared in the main kitchen and then transported into the memory care unit for serving.

Emergency pull cords are present in all resident bedrooms, living rooms, if any, and bathrooms to summon assistance from staff. Personal emergency pendants are available upon request to summon staff assistance. A bed and bedside table along with towels, washcloths, and bedding will be available to all residents, although residents are encouraged to bring their own furniture and personal belongings for their own comfort. The home is equipped with video monitoring cameras in hallways, communal areas, and the exterior of the building. Staff utilize I-phone devices to communicate with one another.

Each resident room is equipped with the Forsite monitoring system. It includes a wall mounted infra-red type camera aimed at the resident's living area (not the bed). The camera monitors movement and records a silhouette of the resident to assess the cause of falls. There is also a threshold device to monitor the resident's entrance/exit into the bathroom. In addition, there is a mattress device that monitors the resident's breathing, heart rate, and restlessness to alert staff to changes in baseline health.

The facility has one exterior courtyard surrounded by the building accessible to the residents in the assisted living area. Another exterior courtyard is gated by an approximately six-foot-tall decorative fence, and it is accessible to residents in the memory care unit.

The facility is equipped with a whole home fire suppression system. Residents of a home for the aged are expected to "shelter-in-place" in case of fire. If smoke and/or fire are present within the residents' immediate area, then those residents move to the adjacent unaffected smoke compartment/safe area of refuge. Residents evacuate the building if/when determined necessary by the fire department. This facility has municipal water and sewer.

The home has a diesel powered 150,000-kilowatt emergency generator that powers the fire alarm system, emergency call system and pendants, phones, data, medication rooms and staff stations, plumbing, egress lighting, kitchen outlets, heat, water, refrigerators, freezers, and every other light in the hallways and dining rooms. Certain red labeled electric plug outlets will also be powered by the generator and can be utilized for resident equipment such as oxygen concentrators and the like.

On 2/18/22, the Dept. of LARA Bureau of Fire Services (BFS) state fire inspector

Larry DeWachter issued fire safety certification approval.

On 2/25/22, the Dept. of LARA Health Facilities Engineering Section engineer Kasra Zarbinian submitted an Opening Survey with Occupancy Approval, Room Sheets, and Floor Plan approving 54 residential units with four units having double occupancy for a total capacity of 58 beds.

On 2/16/22, I conducted an on-site inspection of the building with licensee authorized representative Jennifer Hescott.

## **B. Program Description**

Provision Living of Livonia is operated by AEG Livonia Opco LLC. A business entity search of the State of Michigan Department of Licensing and Regulatory Affairs revealed AEG Livonia Opco LLC is a foreign limited liability company, organized in the state of Missouri, with a Michigan qualification date of 7/17/20.

As a licensed home for the aged, AEG Livonia Opco LLC proposes to provide room, board, and supervised personal care to individuals aged 55 and older in the facility known as Provision Living of Livonia. The facility also represents to the public the provision of services to individuals with Alzheimer's disease or related conditions. Initial and ongoing training will be provided to all staff including specialized training for those working in the memory care area.

AEG Livonia Opco LLC has entered an agreement with Provision Living LLC, to manage the facility on their behalf.

Provision Living of Livonia is a smoke-free facility.

On 5/27/21, AEG Livonia Opco LLC's authorized representative Jennifer Hescott submitted a letter attesting Provision Living of Livonia will not hold resident funds nor refundable deposits. Therefore, no surety bond is necessary.

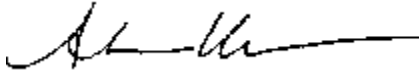

On 2/25/22, Provision Living of Livonia attained approval from Wayne County Health Department for a food establishment license in order to serve meals to non-residents, such as staff, residents' family members, and other visitors.

## **C. Rule/Statutory Violations**

The study has determined substantial compliance with Public Health Code Act 368 of 1978, as amended, and the administrative rule requirements related to a licensed home for the aged.

#### IV. RECOMMENDATION

It is recommended that a temporary 6-month home for the aged license/permit for this facility be issued. The terms of the license will enable the licensee to operate a home for the aged with 58 licensed beds and programs for aged and Alzheimer's disease or related condition care.
