## **II. Purpose of Addendum**

The Licensee, Linda Hirt, has requested a main floor room be approved as a resident bedroom and a main floor bathroom be approved for resident bathing.

## **III. Methodology**

08/18/2022 I received an email from Licensee Linda Hirt requesting that one of the facility's main level rooms be approved for a resident bedroom and that a main level bathroom be approved for resident bathing due to the addition of a shower.

08/18/2022 I reviewed the Original Licensing Study Report which indicates the prospective main floor room contains adequate space. I reviewed that the original Licensing Study Report indicates that at the time of licensure, the main floor bathroom did not contain a shower or bathing area.

08/23/2022 I completed an onsite inspection at the facility. The proposed resident bedroom measures 14 feet by 11 feet for a total 154 square feet which exceeds the required square footage. The proposed resident bedroom contains a portable wardrobe, mirror, chair, window leading outside, and standard construction door leading to the hallway. The wardrobe measures 3 feet by 2 foot for a total 6 square feet. The proposed resident bedroom contains adequate egress. I observed that the main floor bathroom has been altered to include a shower with adequate ventilation via fan and window.

## **IV. Description of Findings and Conclusions**

The proposed main level bedroom was measured and found to exceed the minimum amount of space required. The proposed bedroom contains a portable wardrobe, bed, mirror, and chair. The proposed bedroom's window and standard construction door contain adequate egress. The proposed bedroom contains adequate square footage to accommodate one resident. The facility contains adequate square footage and bedrooms to accommodate 6 residents in total.

## **V. Recommendation**

I recommend the proposed main level bedroom be approved for resident use. The bedroom is approved for the use of one resident. I recommend the facility's total capacity remain six residents in total.
