**II. Purpose of Addendum**

To increase the capacity of Golden Hearts from 3 to 4 residents.

**III. Methodology**

On 02/03/2023 I received a Request for Modification of The Terms of The Registration/License via email requesting Golden Hearts capacity be increased from 3 to 4 residents. Licensee Jennifer Burgess indicated she installed a wireless interconnected smoke detection system as required by special certification licensing rules for facilities providing special certification services for four or more residents.

**IV. Description of Findings and Conclusions**

On 02/17/2023 Licensee Jennifer Burgess texted a video showing the wireless interconnected fire alarm system has been installed and functioning correctly. The facility has adequate space for four residents including adequate bedroom space and living space.

The indoor living and dining areas measure a total of 205.92 square feet of living space. This exceeds the minimum of 35 square feet per occupant requirement. The facility can accommodate four (4) residents.

Each resident will have their own bedroom and each bedroom allows for the minimum 65 square feet of bedroom space for each resident. It is the licensee’s responsibility not to exceed the facility’s licensed capacity.

**V. Recommendation**

I recommend approving the request to increase the capacity of Golden Hearts from 3 to 4 residents.
