IV. Description of Findings and Conclusions

A. Physical Description of Facility

The licensee has added 4 resident bedrooms and a living room area to the existing adult foster care family home. The licensee will continue to use 2 existing bedroom, which are now designated as 5 and 6 in the floor plan, with the new rooms designated as 1-4. The bedroom formerly designated as # 3 no longer exists. Bedrooms 3 and 4 have adequate usable floor space for 2 persons, but will not be used as such, unless the licensee discontinues use of one of the other bedrooms. Bedroom measurements are on file.

Bedrooms 1-3 have to capabilities to have a private ½ bath in each room, but the licensee has not determined if these will be completed as bathroom or become additional closet space for the residents. The licensee has agreed close off the unfinished area, until work there is completed. The home has a full bathroom already in existence for resident use.

A statement is on file from Professional Code Inspections of Michigan, Inc (PCI) indicating the interconnect alarm system is functioning and properly installed. Smoke alarms are in each new resident bedroom and there are 3 located in the new living room. A new furnace and a new water heater are located under the addition. They are not accessible directly from the living area, as you must go outside and into the garage to get to the furnace area. The furnace and hot water heater are in a 5/8 inch drywall with class A rated ceiling tiles in a PCI approved enclosure.

B. Program Description

The licensee has made no changes to the program she provides.

V. Recommendation

It is recommended that the capacity of Eva's AFC Home be increased from 5 to 6 residents effective 3-2-04, as the new addition is in substantial compliance with the applicable Adult Foster Care Family Home Rules.
