III. DESCRIPTION OF FINDINGS & CONCLUSIONS

A. Physical Description of Facility

Sander’s Adult Living Center is located in the City of Detroit. The home is a commercial bi-level building. The home consists of five bedrooms, two full bathrooms, a laundry room, kitchen, and a dining/common area.

The heat plant is located on the same level as the residents. It is enclosed in a room that is constructed of material which has a 1-hour-fire-resistance rating, and the door also has a 1-hour- fire resistance rating. The door is hung in a steel frame and is equipped with an automatic self-closing device and positive-latching hardware. The hot water tank is located in the basement. Floor separation between the basement and the main level of the facility is created by a 1-hour-fire-resistance rating door. The door is hung in a steel frame and is equipped with an automatic self-closing device and positive-latching hardware.

The facility is equipped with interconnected, hardwire smoke detection system, with battery back-up, which was installed by a licensed electrician and is fully operational. The facility is equipped with fire extinguishers which are located on each level of the facility.

Resident bedrooms and dining/common area were measured during the on-site inspection and have the following dimensions:

Bedroom #	Room Dimensions	Total Square Footage	Total Resident Beds
1	19 X 8	152	1
2	14 X 10	140	1
3	10 X 9	90	1
4	10 X 9	90	1
5	24X 11	264	2

The dining/common area measure a total of 273 square feet of living space. This exceeds the minimum of 35 square feet per resident requirement.

Based on the above information, it is concluded that this facility can accommodate six (6) residents. It is the licensee’s responsibility not to exceed the facility’s licensed capacity.

This facility cannot accommodate wheelchairs.
