**II. Purpose of Addendum**

The home is a ranch-style walk-out with 4 resident bedrooms on the main floor. Residents only occupy the main level of the home, and the licensee and spouse occupy the lower walk-out level of the home. The home is currently licensed to provide 24-hour supervision, protection, and personal care to the following program types: mentally ill, developmentally disabled, aged, Alzheimer's, and physically handicapped populations. The original licensing report written in 2015 does not identify the home as wheelchair accessible. Licensee Yvonne Aninure submitted a modification request for an addendum to the original report to reflect that the home is wheelchair accessible.

**III. Methodology**

On 8/13/2025, Yvonne Aninure submitted a modification request to add to the original licensing report that the home is wheelchair accessible which was not written in the report in 2015 when the license was issued even though the home met the family home means of egress for wheelchairs administrative rule at that time.

On 8/13/2025, an onsite inspection of the facility was completed and found this family home to be equipped with at least 1 ramp located at the front entrance of the home which is the primary means of egress from the first floor and that wheelchairs can move throughout the home.

**IV. Description of Findings and Conclusions**

Compliance with the licensing act and administrative rules related to means of egress for wheelchairs have been determined.

**V. Recommendation**

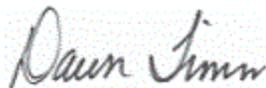

I recommend the licensing report reflects that this home is wheelchair accessible.
