RE: License #: AS580291609
Elderly Solutions Inc - II
100 Santure Rd #2
Monroe, MI 48162

Dear Mr. Sathri:

Attached is the Renewal Licensing Study Report for the facility referenced above. The violations cited in the report require the submission of a written corrective action plan. The corrective action plan is due 15 days from the date of this letter and must include the following:

- How compliance with each rule will be achieved.
- Who is directly responsible for implementing the corrective action for each violation.
- Specific dates for each violation as to when the correction will be completed or implemented.
- How continuing compliance will be maintained once compliance is achieved.
- The signature of the licensee or licensee designee or home for the aged authorized representative and a date.

Upon receipt of an acceptable corrective plan, a regular license will be issued. If you fail to submit an acceptable corrective action plan, disciplinary action will result.

Please contact me with any questions. In the event that I am not available and you need to speak to someone immediately, you may contact the local office at (313) 456-0380.

Sincerely,

A handwritten signature in blue ink that reads "Pandrea Robinson". The signature is written in a cursive, flowing style.

CAP dated 01/30/24 R 204(3) 205 (3) 208 (1) e ,312(1) 318 (5) N/A
- Number of excluded employees followed-up? N/A
- Variances? Yes (please explain) No N/A

III. DESCRIPTION OF FINDINGS & CONCLUSIONS

This facility was found to be in non-compliance with the following rules:

R 400.619 Emergency preparedness plan.

(8) A licensee shall practice the emergency preparedness plan, including the fire safety plan, at least once a quarter per calendar year during each shift, 7 a.m. to 3 p.m., 3 p.m. to 11 p.m. and 11 p.m. to 7 a.m. A record of the practices must be maintained for 2 years.

At the time of inspection, I reviewed the fire drills and observed that drills were not conducted at least once a quarter during each shift. Additionally, the drills were conducted with the adjacent licensed facility and therefore do not reflect accurate evacuation times. Residents were also not being evacuated during every drill as required.

R 400.675 Resident medications.

(4) A licensee, administrator, or direct care staff shall comply with the following when supervising the taking of medication by a resident:

(b) Complete an individual medication log that contains all of the following:

(i) Medication name.

(ii) Dosage.

(iii) Label instructions for use.

(iv) Time to be administered.

(v) Initials of the individual who administered the medication at the time given.

(vi) Resident's refusal to accept prescribed medication or procedures at time of refusal.

At the time of inspection, I observed Resident A's medication administration record (MAR) and observed the following;

- Atenolol 50mg tablet (pm dose) was not initialed as given on 01/26/26.
- Nystatin 100,000 unit powder (am dose) was not initialed as applied on 01/02/26, 01/03/26, 01/05/26, 01/06/26. The powder was also not initialed as applied on 01/26/26 (pm dose).
- Pantoprazole 40 mg was not initialed as given on 01/13/26.

R 400.685 Resident admission; resident assessment plan; resident care agreement; health care appraisal.

(10) A resident or resident's designated representative shall provide a written health care appraisal or a medical discharge summary by an appropriate health care professional that is completed within the 90-day period before admission. A written health care appraisal must be completed at least annually thereafter. If a written health care appraisal is not available at the time of an emergency admission, a licensee shall require that the appraisal be completed no later than 30 days after admission.

At the time of inspection, I observed that Resident A's health care appraisal was not completed until 10/01/25. Resident A was admitted into the facility on 09/10/25.

R 400.731 Flame-producing equipment; enclosures.

(2) Heating plants and other flame-producing equipment located on the same level as the residents must be enclosed in a room that is constructed of material that has a 1-hour-fire-resistance rating and has a door made of 1-3/4-inch solid core wood. The door must be hung in a fully stopped wood or steel frame and must be equipped with an automatic self-closing device and positive-latching hardware.

At the time of inspection, I observed the fire door. The screws attaching the hinges to the door appeared to be stripped, causing them to be loose and preventing the door from closing and latching properly.

IV. RECOMMENDATION

Contingent upon receipt of an acceptable corrective action plan, I recommend the status of the license remain unchanged.

A handwritten signature in blue ink that reads "Pandrea Robinson". The signature is written in a cursive, flowing style.
