III. DESCRIPTION OF FINDINGS & CONCLUSIONS

A. Physical Description of Facility

Southport AFC is a one-story facility with an attached one and a half car garage with a basement. The exterior of the home is comprised of brick and vinyl siding. The home consists of a living room, sitting room, dining room, kitchen, four resident bedrooms, two full bathrooms, a laundry room, and an office. The facility is owned by Saginaw County Community Mental Health Authority (SCCMHA) and permission was granted for inspection of the home. There is an agreement between Southport AFC and SCCMHA.

The furnace and hot water heater are in the basement of the home with standard building material used for floor separation. The floor separation includes a 1-3/4-inch solid core door that is equipped with an automatic self-closing device. A furnace inspection and approval were completed on September 8, 2025. The laundry room is located on the main floor of the home. The facility is equipped with a smoke detection system. The smoke detectors are all hard-wired into the home's electrical system with

battery back-up and are in all sleeping and living areas. The facility has public water and sewer system.

There are four resident bedrooms located on the main floor of the home. Resident bedrooms were measured during the on-site inspection and have the following dimensions:

Bedroom #	Room Dimensions	Total Square Footage	Total Resident Beds
1	15'1" x 10'6"	158	1
2	15'3" x 10'9"	164	2
3	14'7" x 10'6"	153	2
4	14'8" x 10'8"	156	1

The living room, sitting room, and dining room areas measure a total of 447 square feet of living space. This exceeds the minimum of 35 square feet per resident requirement. Compliance with Rule 400.661, bedroom furnishings were demonstrated at the time of the final inspection. The bedrooms were clean, neat, and met all applicable rules relating to environmental and fire safety requirements.

The home has two (2) separate and independent means of egress to the outside. The required exit doors are equipped with positive latching non-locking against egress hardware. All the bedroom and bathroom doors have conforming hardware and proper door width. This home wheelchair accessible.

The home has fire extinguishers, which meets the requirements of R 400.723. The bedrooms have the proper means of egress as required by R 400.725. The interior of the home is of standard lathe and plaster finish or equivalent in all occupied areas. The home meets the environmental and interior finish requirements of rules R 400.717, R 400.719, and R 400.721.

Based on the above information, it is concluded that this facility can accommodate **six (6)** residents. It is the licensee's responsibility not to exceed the facility's licensed capacity.
