III. DESCRIPTION OF FINDINGS & CONCLUSIONS

A. Physical Description of Facility

This facility is located at 713 Westcombe Ave, Flint, MI in Genesee County Michigan. The physical plant is a split-level structure constructed of brick and vinyl. This facility is a two-level building with a basement. The basement will not be used by residents. The facility has a fully equipped kitchen, staff office, living room and a laundry and utility room in the basement. There is one full bathroom on the same level as the residents' bedrooms available for residents use. The facility is located within a few miles of shopping centers, banks, medical facilities, and other community-based resources. The facility is not wheelchair accessible. This facility is owned by the applicant.

The furnace and hot water heater are located in the basement area, in a room that is constructed of material that has a 1-hour-fire-resistance rating. The furnace and hot water heaters were inspected on 06/25/2026 and are in good working order. The facility is equipped with an interconnected, hardwire smoke detection system, with battery back-up, which was installed by a licensed electrician and is fully operational. The laundry room is located in the lower level of the facility.

The facility utilizes public utilities. The facility was determined to be in substantial compliance with all applicable licensing rules pertaining to environmental health.

Resident bedrooms were measured during the on-site inspection and have the following dimensions:

Bedroom #	Total Square Footage	Total Resident Beds
Bedroom 1	126 Sq. Ft.	1
Bedroom 2	144 Sq. Ft.	2

The living, dining, and sitting room areas measure a total of 350 square feet of living space. This exceeds the minimum of 35 square feet per resident requirement.

Compliance with requirements for bedroom furnishings was demonstrated at the time of the final inspection. The bedrooms were clean, neat and met all applicable rules relating to environmental and fire safety requirements.

The home has two separate and independent means of egress to the outside. The means of egress were measured at the time of the initial inspection and exceeded the 30-inch minimum width requirement. The required exit doors are equipped with positive latching non-locking against egress hardware. All the bedroom and bathroom doors have conforming hardware and proper door width.

The bedrooms have the proper means of egress as required. The interior of the home is of standard lathe and plaster finish or equivalent in all occupied areas. The home meets the environmental and interior finish requirements to meet licensing rules.

Based on the above information, it is concluded that this facility can accommodate **three (3)** residents. It is the licensee's responsibility not to exceed the facility's licensed capacity.

B. Program Description

The applicant, Tamika Dukes, has submitted a copy of the required documentation. Admission and discharge policies, program statement, refund policy, personnel policies, and standard procedures for the facility were reviewed and accepted as written. The program will include social interaction skills, personal hygiene, personal adjustment skills, and public safety skills. An assessment plan will be designed and implemented for each resident's social and behavioral developmental needs.

If required, behavioral intervention and crisis intervention programs will be developed as identified in the assessment plan. These programs shall be implemented only by trained staff, and only with the prior approval of the resident, guardian and the responsible agency.
