II. Purpose of Addendum

The purpose of this addendum to the original licensing study is to change the capacity of the home from 16 residents to 17 residents and to convert an office into a private bedroom.

III. Methodology

On May 4, 2006, this licensing consultant inspected the physical plant at Bay Valley Adult Foster Care, Inc.

On May 3, 2006, the original licensing study report and floor plan with room dimensions was reviewed.

IV. Description of Findings and Conclusions

The private bedroom on the east side of the building that was being used as an office has been reconverted back to private bedroom. The bedroom contained 85 square feet of useable floor space. The smoke detection system was hardwired to the building's electrical supply and was sprinkled. The door hardware was the non-locking-against-egress type. This bedroom had a closet and one large operable window.

The original licensing study indicated the living room and dining rooms contained 756 square feet of space. This equates to 44.47 square feet of common space per resident with 17 residents occupying the home.

V. Recommendation

I recommend that the terms of the license be changed so that Bay Valley Adult Foster Care, Inc., can accommodate 17 residents. This has been accomplished by the conversion of an office into a private bedroom.
