II. Purpose of Addendum

During a routine license renewal inspection of this facility it became known that an addition had been made to the building. The addition caused resident bedroom to be relocated.

III. Methodology

07/17/2008-Interviewed the co-licensees and inspected the facility.

IV. Description of Findings and Conclusions

The addition to the facility consists of a three stall garage, a bonus room, three second floor resident bedrooms, a den, and a full second floor bathroom. This addition is connected to the existing facility via interior hallways. Three residents are assigned bedrooms in the addition.

The three new resident bedrooms (2nd floor) have the following dimensions:

- Resident room #1-10'6" x 17'4"= 181.96 square feet for 1 resident
- Resident room #2-13'6" x 13'4"=179.95 square feet for 1 resident
- Resident room #3-10'6" x 17'4"=181.96 square feet for 1 resident

The old area of the house (main floor) have resident bedrooms with the following dimensions:

- Resident room #4-16'5" x 12'8"=207.82 square feet for 1 resident
- Resident room #5-16'5" x 12'8"= 207.82 square feet for 1 resident
- Resident room #6-14'4" x 9'=128.97 square feet for 1 resident

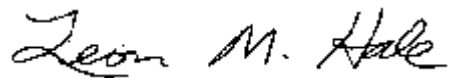

The amount of living space changed with the addition. The family room, dining room, living room and den measure a total of 989 square feet. This is sufficient for the 11 occupants of the facility.

All AFC residents now have private bedrooms. The facility continues to have a hardwired interconnected multistation smoke detection system.

Based on the above it is concluded the facility can accommodate six (6) AFC residents.

V. Recommendation

This addendum is being produced to document the changes made to the building. It is recommended that no change be made in the capacity of the facility.
